## Zoning Director Hired By County

The start of Palm Beach County's new zoning and planning project will get underway in mid-September, headed by G. H. "Gerry" Schultz, who has been appointed county zoning director.

Schultz's appointment was made Monday by the County Commission and will become effective Sept. 15.

The new director, a resident of Palm Beach Shores, was picked from a field of 14 applicants for the position on recommendation of George W. Simons, Jr., Jacksonville, the county's zoning and planning consultant.

County Engineer Steve Middleton, of whose department the new zoning section will be established, said Simons was coming here in mid-September to lay out the initial phase of the county's zoning project.

First steps of the project, Middleton said, will be a detailed survey of the entire county to determine present land use in the area.

The county's five point zoning plan will only apply to rural areas and will not supplant zoning codes now being used in the city of Palm Beach.

First steps of the project, Middleton said, will be a detailed survey of the entire county to determine present land use in the area.

After adoption of a county zoning plan, the citizen group will be named to serve as an appeals board.

About a year and a half of study and planning is expected before the zoning plan is ready for final consideration.

Mr. Schultz is a native of Chicago, attended public schools in that city and later worked in the engineering department of the Armour Institute of Technology and the University of Illinois.

He has been associated with the development of Palm Beach County for some 20 years and came to the county in 1935 working in the Everglades section for the Celotex Corp.—a firm which helped pioneer the sugar industry in the county.

Schultz has had a long life of experience in the engineering field and in addition to his work with the Celotex firm has been associated with several Illinois contractors and building materials firms.

Six years ago, Schultz moved to Palm Beach County to establish a permanent residence, giving up a vice presidency with the Acousti Engineering Company of Charlotte, N. C.

Since coming to Palm Beach Shores, Schultz has taken an active part in the civic affairs of that community as well as in the northern section of Palm Beach County. He said he would disassociate himself with these activities to devote his full time to helping plan the future development of the entire county.

THE \$4,300,000 APPROPRIATED by Congress to the Corps of Engineers for construction on the Central and Southern Florida Flood Control Project during fiscal year 1956 will be used as follows: The accompanying map, the shaded symbols are works on which construction will be continued or started. The solid symbols represent works already completed.

The fiscal year 1956 construction program was worked out by the Corps of Engineers in cooperation with the Central and Southern Florida Flood Control District. The \$4,300,000 Federal funds will be supplemented by a cash contribution from local interests—represented by the Flood Control District. The local cash contribution is 15 per cent of all construction costs, in addition to which the Flood Control District furnishes all lands required, and operates and maintains the completed works.

## Lake Harbor Pump Station And L-6 Contracts To Be Let In September

Bids will soon be taken on two large construction jobs for the Central and Southern Florida Flood Control Project, according to Colonel E. E. Kirkpatrick, Jacksonville District Engineer.

On August 3, invitations were issued for bids on construction of Levee 6 in south Palm Beach County. The levee will actually be a double levee with a borrow canal between, requiring excavation of about 2,100,000 cubic yards of material. It will extend from the Hillsboro Canal, at the point where Pumping Station 6 is now under construction, southwest about 11 miles to the South New River Canal at the Broward-Palm Beach County line. Levee 6 will form the boundary between the Okeechobee Agricultural and Conservation Area, No. 2 of the flood-control project.

Colonel Kirkpatrick will open the Levee 6 bids on September 7 in his Jacksonville office. He estimates that actual construction will begin about the first week of October.

The second flood-control job on which bids are soon to be taken is construction of Pumping Station 3, including a modification to Hurricane Gate 3, at Lake Harbor on the South Shore of Lake Okeechobee. The pumping station will be built in the area of the old Hurricane Gate 3, where the Miami Canal joins the lake. It will be built of reinforced concrete and masonry, similar to others already under construction in the project area.

The pumps and machinery to be installed in the station are being supplied by Fairbanks-Morse and Company under a \$1,500,000 contract awarded by the Army Engineers on May 18.

The hurricane gate modification consists of changing the present manually operated masonry gate to a pump-driven operation of the gates with push-button control.

Invitations for bids on construction of the pumping station were issued by Col. Kirkpatrick on August 9. He will open the bids on September 7 in his Jacksonville office.

Funds from the certificate will provide for a new county administrative office in the Glades section of the pumping station, a fund of \$180,000 for air conditioning, furnishings and a third story for a court in the office building in West Palm Beach; \$95,000 for court house furnishings; \$30,000 for a new county children's home; and \$75,000 for interest, fiscal agent fees and a contingency funds.

DEMAND FOR 1955 CHRYSLERS RESULTS IN HUGE EXPANSION! This new Chrysler plant, started last March, includes a continuous conveyor system 14 miles long, will add 40% to Chrysler's production facilities.

## The greatest new-car buying opportunity of the year!

Thanks to the record-breaking demand for its 1955 cars—the "hottest" cars of the year—Chrysler has had to expand tremendously. Upon completion of this Giant Expansion Program, the new plant shown above can boost Chrysler Windsor V-8 and New Yorker production a full 40 per cent!

We know that huge automobile plants aren't built in a day. It's a job that takes several months. That's why we've tried to stock up on enough new 1955 Chrysler Windsor V-8's and New Yorkers to take care of our customers through the season. We've filled our entire year's supply now, at mid-year.

**Pick from our big array of models and color combinations**  
Right now, our showroom looks like a Chrysler catalog come-to-life! We can give you an almost unlimited choice of color combinations

and body styles—something we haven't been able to do since the big "run" on 1955 Chrysler began the day they were first introduced. But indications are that there just won't be enough to go around. So we urge you to come in now.

**Trade-in value of your present car will never be higher than it is now**  
That's right! Every day you wait, your present car is worth less and less. Now's the time to trade.

**Why we're anxious to get your car**  
Once our present stock of new Chrysler's is moved out, we won't get any more. That's why—today—we're in a hurry to get our used car stocks filled out, so we can be all

set later on. Because there's nobody unhappier than an automobile dealer without automobiles to sell.

**We're inviting you to take the 100-Million-Dollar Ride today**

If you've been waiting for a real buy on your new 1955 Chrysler Windsor V-8 or New Yorker... wait no longer! When these cars are gone, that's it! Stop in today. Take the wheel and take off on Chrysler's 100-Million-Dollar Ride—the ride all America is talking about. Then get the figures on your trade-in allowance... the best you'll find in town... and choose from our great selection of models and color combinations. We think you'll agree, this truly is the greatest new-car buying opportunity of the year!

All 1955 Chrysler's are V-8's... up to 300 hp.

operation leaves very little for the taxpayer, as such to pay from the public coffers. Fines and forfeitures almost equal the costs so far this year.  
However, it is emphasized by Chief Goodlett, there is absolutely no relation in his department between the two, and he could not give these figures. He is interested only in his budget.  
There have been 1975 convictions out of a total of 2,348 arrests during this year, so far; 248 were dismissed, 113 were turned over to the county, nine to the immigration authorities

and three to Pahokee.  
Belle Glade's policemen begin work at \$210 per month and may increase this three per cent annually for ten years. Lake Worth and Delray Beach pay their starting policemen \$62.50 per week and \$251 per month, respectively.  
The national average of 1.5 police department employees for cities the size of Belle Glade is matched here by a 1.33 employees per 1,000 persons served.  
The local policemen work 48 hours per week normally and are covered by workmen's compensation; each employee is entitled to two week's vacation

with pay and hospitalization for employees, not families, is arranged.  
Belle Glade's fingerprint department is recognized as an outstanding one by the FBI as well as other public agencies; the Department has a drunkometer, which is recognized in the degree of imbibing.  
The following comparisons are from the U. S. Department of Justice Uniform Crime Reports; local scores are taken from the records.

tor told Rotarians of his early knowledge of the Glades and the progressive steps involved.  
Several years had passed with these groups of cattle and the Experiment Station had demonstrated effective control in worms and other conditions affecting cattle, and "determining to take advantage of nature's assistance to the cattleman in the muck lands."  
"I have purchased land, and am now running several thousand head in the mucklands. If I were twenty years younger I would expand my pasture holdings to my capacity in this territory, for I believe in it."  
Mr. Thompson's analysis of the Glades as a cattle country in such a thorough manner before becoming a part of and his success on the muckland have a background of feeding operations in four or five of our mid-western and southern states. He is an outstanding feeder and finisher in the United States.  
He pointed out to his audience that nearness to market is a condition that could and would be improved for the Glades beef producer. However, he emphasized the advantage of the production of high commercial and good carcasses on Glades grass.

**Two Hospitalized In Accident On SR 700**  
State Road 700 was the scene Monday of an accident which injured two persons. At 4:15 p.m., an automobile attempting to pass a gasoline truck crossed the road and struck, injuring a Hildahl truck, both of Columbus, Ohio. The pair was taken to the Everglades Memorial Hospital by State Trooper John Hicks, who investigated the accident.  
Hicks reported that Mrs. Hawkey is suffering from a fracture of the pelvis and severe cuts and bruises. Mrs. Burt is stricken with a possible fracture of an ankle and severe cuts and bruises.  
Apparently the automobile, driven by Mrs. Hawkey, attempted to pass the tractor-trailer gasoline truck driven by Eule McClellan of Tampa, McClellan, trying to avoid hitting some men who were working along the side of the road, the shoulder, swerved into the path of Mrs. Hawkey's oncoming car which hit one wheel of the truck.  
The car skidded for a distance of 99 feet, according to State Trooper Hicks, and collided with a parked dump truck on the side of the road. Hicks stated that no charges were filed against McClellan, driver of the truck.  
The two women were reported to be German-born wives of American soldiers and were returning from a visit to another German bride in Fort Lauderdale.

Prowlers Enter Home Of O'Neil Walkers

Prowlers reportedly entered the home of Mr. and Mrs. O'Neil Walker in Fisher Subdivision, South Bay, Wednesday night, or early Thursday morning, with their only lost a fountain pen and \$24.00 in cash.

According to Mrs. Walker, she awakened about 4:30 a.m. Thursday with the uneasy feeling that someone had been moving around in her room — the bedroom door was left open and she noticed her billfold was missing from the night stand.

On investigating she found the billfold left turned inside out on the piano in the living room.

She awakened her husband who was sleeping in the adjoining bedroom and reported her findings. A further search of the home disclosed the loss of a fountain pen, a pair of glasses and \$24.00 from a billfold belonging to a colored girl, Mary Lee Smith, who was sleeping on the back porch. The back door had been left open and the Walkers later found the glasses in the back yard.

Mr. Walker's bedroom where he had the cash box from their service station, had not been entered.
